

Hey, David. I don't seem to be able to connect to the network. Do you have any idea what's going on?

Yeah. I just called the IT department to find out and they told me the entire computer network will be down for the rest of the day.

Did they tell you what the problem was?

Apparently there's a virus attack going on and it's caused the whole system to close down automatically. They say it will be several hours before they can fix it.

It couldn't happen at a worse time for me. I'm supposed to send my monthly report out today.
