

VUCA / BANI

Today's workplace is a complicated place. It can be difficult to make decisions and to advance.

VUCA	<u>V</u>olatile	The environment demands you react quickly to ongoing changes that are unpredictable and out of your control
	<u>U</u>ncertain	The environment requires you to take action without certainty
	<u>C</u>omplex	The environment is dynamic, with many interdependencies
	<u>A</u>mbiguous	The environment is unfamiliar, outside of your expertise

It's a BANI world:

BANI = Brittle, Anxious, Non-linear and Incomprehensible

FMEA = Failure Mode and Effects Analysis (Risk management)
